

ULTIMATE BAR BY ZEEKO

The ultimate bar is a new concept of controlling your kite without the need for a Clamcleat or depower straps. It adapts to your exact requirement immediately. No more cleats that become jammed with sand or corrosion, no more hanging depower straps. The ultimate bar reaches an unprecedented level of rider comfort by keeping the technology simple.

General Characteristics:

- Adjustable Bar length 46-54 cm & 3D Grip
- One Bar for all sizes of kites
- Lines 20m + 4m extensions included (wider wind use for all kites)
- Optional ERA Line relaunch – the benchmark in kite relaunch systems

A 3 functions stopper

Maximum power

Depower

L'UDS (Ultimate Depower System) uses a return pulley, an 'O' ring and a moulded stopper to provide 3 key functions:

- 1 - A function that allows you to easily set-up your bar in accordance with your ride-style and body anatomy.
- 2 - A power-on function: pulling the black strap allows you to have more power in your kite.
- 3 - A de-power function: by pulling the red strap, you can immediately reduce the power.

The return pulley keeps your trim-system clean & tangle free at all times: even when you are fully depowered there are no dangling elements. The position of the metal ring indicates the level of power control at a glance. The closer the ring is to the pulley, the more power you will have in the kite.

New UDS chicken loop

The new UDS chicken loop integrates a release mechanism that is easily identifiable by its color and is intuitive in its operation, with minimal trigger force. It works under all conditions and is really easy to reload; including an integrated high performance swivel; a removable donkey-dick and a suicide leash secure mode option.
